#### **DETAILED ACTION**

#### Election/Restrictions

Claims 1-32 are withdrawn from further consideration pursuant to 37 CFR
 1.142(b) as being drawn to a nonelected claims, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 7.

### Claim Rejections - 35 USC § 112

2. Claims 39-46 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding Claim 39, line 6, the language "said at least movable one arm" is not entirely clear since the original language in line 4 recites "at least one movable arm". The language in line 6 implies something other than what was intended. Regarding Claim 40, line 1, "wherein antenna array" is unclear because it lacks "said" before "antenna".

Regarding Claim 41, the language "at least antenna" in lines 3 and 5 is not understood. Does this imply one or more than one?

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

• Application/Control Number: 09/810,858

Art Unit: 2821

4. Claims 41-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brady et al (6166638).

Regarding Claims 41 and 46, Brady et al show in Fig. 8 shows a method of communicating with stacked objects 71-73 containing wireless communication devices comprising the steps of activating a switch to provide a coupling to at least one antenna in an array, where the interrogator 82 has at least one antenna and the interrogator must be turned on to radiate the beam therefrom; exciting the at least one antenna with energy, and radiating the energy from the at least one antenna to the stacked objects, where the interrogator detects at least one beam from the objects 71-73. It is obvious to the skilled artisan that the interrogator must be switched on to radiate the energy/beam at the objects 71-73. It would also have been obvious to the skilled artisan that the antenna of the

Regarding Claim 42, low energy is provided as recited.

interrogator may be part of an array antenna.

Regarding Claim 43, high energy is provided as recited. In both cases, the energy level radiated is relative.

Regarding Claim 44, the energy is reflected back so the interrogator can compare the signals from the transponders.

Regarding Claim 45, it would have been obvious to the skilled artisan that the height of the objects is determined by receiving energy by the highest transponder.

Art Unit: 2821

### Allowable Subject Matter

5. Claims 33-38 and 47-52 are allowed.

6. Claims 39 and 40 would be allowable if rewritten or amended to overcome the

rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Michael C. Wimer whose telephone number is (703)

305-3555. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Don K. Wong can be reached on (703) 308-4856. The fax phone numbers

for the organization where this application or proceeding is assigned are (703) 308-7722

for regular communications and (703) 308-7724 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is (703) 308-

0956.
